## Morning Birding Tour - Excursion, Morning time

The birding activity starts early in the morning at sunrise when the birds become active. Most mornings you will meet with other birders on the balcony for a quick cup of coffee or tea at dawn. Then it's birding on the balcony to see what comes to the feeders, off to the insect light to see some of the insect feeding species like the Red-throated Ant Tanager, or birding around the lodge. You will come back for a full breakfast at 7:00 am. After breakfast you will head out on the trails in the private forest reserve to look for mixed species flocks. Several different species can be seen foraging together in the canopy and understory of the forest. Birdwatching in the rainforest can be challenging and will take some skills. You will probably spend all morning in the forest moving quietly along a trail to watch and listen for the birds. If you are looking for a certain species, you can talk to a guide who will be happy to give you advice on where to see it, or you can hire a guide to maximize your birding experience. Then it's back to the lodge for a delicious and healthy lunch.
